THE PAW PRINT

MARCH 26, 2019

Dear Lindsey Families,

Our Lindsey Lions are loving the dry playground and beautiful weather! We are looking forward to starting to replant parts of the butterfly garden as we begin our spring science units on life cycles, plants, and adaptations.
Last week our Kindergarten students had the opportunity to participate in our first ever Hands-On Science Lab run by our Kinder parent volunteers. Students explored characteristics of plants and animals and made connections about what they need to survive. Please see a few of the pictures we captured of their learning located on the following page. They were too precious not to share! The Parent Hands-On Science program has been a dream of mine since before we opened our doors. I am so glad to finally get this program off the ground. This year every grade level will participate in one lab run by our parent volunteers before the school year ends. We will expand the program next year to include more labs both in the Fall and Spring semesters. If you have a 1st – 5th grade student please be on the lookout for opportunities to volunteer to help out with your child's Hands-On Science lab.

The safety of our students is our number one priority. Throughout the last two years our school in cooperation with the district, the county, and local law enforcement agencies have collaborated and developed a comprehensive safety plan. Although we hope that we will never have to use parts of our plan rest assured we are trained and prepared. Part of our continued training involves the drills that take place monthly. These drills allow for the students and teachers to practice so everyone knows exactly what to do and where to go. Some of our drills take place monthly and others occur each semester. Last week there were some concerns about us practicing two drills in one week. The first drill was an evacuation drill and the second drill was a hold drill. The hold drill better known as a tornado drill was scheduled to take place last month when it literally rained almost every single day. It is a personal preference of mine to not practice the hold drill on bad weather days when the students think there is a possibility of a real tornado. With the Texas weather being so unpredictable I decided to hold the delayed drill as soon as we had good weather. Although we like to spread our drills out when we are forced to postpone due to weather or testing schedules there may be times when I make the decision to practice more than one drill in a week. If you ever have any concerns, questions, or suggestions please do not hesitate to call me.
We are so proud of our 3rd and 4th graders for working so hard on their STAAR Benchmark assessments this week! Have a wonderful week and do not forget to take a peek and bid on the FOL's online auction!!
