Automotive Technology I At-A-Glance - Lamar CISD

Ongoing Skills	Professional Standards/Employability Skills/Technical Skills		
Imbedded All Year	ATI 1(A) The student will demonstrate knowledge of the technical knowledge and skills related to health and safety in the workplace such as safety glasses and other personal protective equipment (PPE) and safety data sheets (SDS).		
Grading Period	Unit Name	Estimated Time Frame	TEKS
	Professional Standards/Employability Skills	10 Days	1.A, 1.B, 1.C, 1.D, 1.E, 1.F, 1.G, 1.H, 9.J
	 ATI 1(A) The student will demonstrate knowledge of the technical knowledge and skills related to health and safety in the workplace such as safety glasses and other personal protective equipment (PPE) and safety data sheets (SDS). ATI 1(B) The student will identify career and employment opportunities, including entrepreneurship opportunities, and internships and industry-recognized certification requirements for the field of automotive technology. ATI 1(C) The student will demonstrate the principles of group participation, team concept, and leadership related to citizenship and career preparation. ATI 1(D) The student will apply competencies related to resources, information, interpersonal skills, problem solving, critical thinking, and systems of operation in the automotive technology industry. ATI 1(E) The student will discuss certification opportunities. ATI 1(F) The student will discuss response plans to emergency situations. ATI 1(G) The student will identify employers' expectations and appropriate work habits, ethical conduct, legal responsibilities, and good citizenship skills. ATI 1(H) The student will develop personal goals, objectives, and strategies as part of a plan for future career and educational opportunities. ATI 9(J) The student will inspect, test, and service positive crankcase ventilation (PCV) system and its components such as the filter/breather cap, valve, tubes, orifices, and hoses. 		
	Engine Repair	6 Days	3.A, 3.B, 4.A, 4.B, 9.A, 9.B, 9.C, 9.D, 9.E, 9.F, 9.G, 9.H, 9.I, 5.G
Grading Period 1 29 Days	 ATI 3(A) The student will locate the manufacturer recommended preventative maintenance schedule. ATI 3(B) The student will perform a preventative maintenance inspection of vehicle systems, including engine, engines, fuel, lubrication, cooling, electrical, and air conditioning systems. ATI 4(A) The student will demonstrate the proper use of hand and power tools and equipment commonly employed in the maintenance and repair of vehicles. ATI 4(B) The student will discuss the proper handling and disposal of environmentally hazardous materials used in servicing vehicles. ATI 9(A) The student will inspect and explain the electrical/electronic components, sensors and circuits on an on board diagnostics (OBD) controlled engine. ATI 9(B) The student will perform engine absolute manifold pressure tests such as vacuum or boost. ATI 9(C) The student will remove and replace spark plugs and inspect secondary ignition components for wear and damage. ATI 9(E) The student will describe the importance of operating all OBD II monitors for repair verification. ATI 9(F) The student will retrieve and record diagnostic trouble codes, OBD II monitor status, and freeze frame data and clear codes when applicable. ATI 9(G) The student will inspect, service, or replace air filters, filter housings, and intake duct work. ATI 9(H) The student will inspect fuel filter or filters. ATI 9(I) The student will inspect integrity of the exhaust manifolds, exhaust pipes, mufflers, catalytic converters, resonators, tail pipes, and heat shields. ATI 9(G) The student will service and repair cooling and lubrication systems. 		
	NATEF I. Engine Repair A. General	6 Days	NATEF I.A
	 NATEF I. Engine Repair A. General 1. The student will research vehicle service information, including fluid type, vehicle service history, service precautions, and technical service bulletins. NATEF I. Engine Repair A. General 2. The student will verify operation of the instrument panel engine warning indicators. NATEF I. Engine Repair A. General 3. The student will inspect engine assembly for fuel, oil, coolant, and other leaks; determine necessary action. NATEF I. Engine Repair A. General 4. The student will install engine covers using gaskets, seals, and sealers as required. NATEF I. Engine Repair A. General 5. The student will verify engine mechanical timing. NATEF I. Engine Repair A. General 6. The student will perform common fastener and thread repair, to include: remove broken bolt, restore internal and external threads, and repair internal threads with thread insert. NATEF I. Engine Repair A. General 7. The student will identify service precautions related to service of the internal combustion engine of a hybrid vehicle. 		

	···		
	NATEF I. Engine Repair B. Cylinder Head and Valve Train NATEF I. Engine Repair C. Lubrication	7 Days	NATEF I.B, 1.C
	and Cooling Systems		
	NATEF I. Engine Repair B. Cylinder Head and NATEF I. Engine Repair B. Cylinder Head and Valve Train 1. The st NATEF I. Engine Repair B. Cylinder Head and Valve Train 2. The st train.	udent will adjust valves	
	NATEF I. Engine Repair C. Lubrication and C NATEF I. Engine Repair C. Lubrication and Cooling Systems 1. The to identify leaks; check coolant condition and level; inspect and test and galley plugs; determine necessary action. NATEF I. Engine Repair C. Lubrication and Cooling Systems 2. The tensioners, and pulleys; check pulley and belt alignment. NATEF I. Engine Repair C. Lubrication and Cooling Systems 3. The gasket/seal. NATEF I. Engine Repair C. Lubrication and Cooling Systems 4. The coolant; flush and refill cooling system; use proper fluid type per man NATEF I. Engine Repair C. Lubrication and Cooling Systems 5. The fluid type per manufacturer specification; reset maintenance reminde NATEF I. Engine Repair C. Lubrication and Cooling Systems 6. The	student will perform coor radiator, pressure cap, c student will inspect, rep student will remove, ins student will inspect and nufacturer specification; student will perform eng er as required.	coolant recovery tank, heater core, lace, and/or adjust drive belts, pect, and replace thermostat and test coolant; drain and recover bleed air as required. gine oil and filter change; use proper
	Brakes Repair C. Drum Brakes and D. Disc Brakes	9 Days	1.A, 5.A, 5.B, 5.C, 5.D, 5.E, 5.F, 5.G, 5.H, 5.I, 5.J, 5.K, 5.L
Grading	 ATI 1(D) The student will apply competencies related to resources, information, interpersonal skills, problem solving, critical thinking, and systems of operation in the automotive technology industry. ATI 5(A) The student will explain Pascal's Theory of Hydraulics as it relates to the brake system. ATI 5(B) The student will inspect brake system components, including master cylinder, brake lines, wheel cylinders, calipers, and flexible hoses and fittings, for external leaks and proper operation. ATI 5(C) The student will inspect, measure, and refinish brake drum diameter to manufacturer specifications. ATI 5(D) The student will remove, clean, and inspect brake shoes, springs, pins, clips, levers, adjusters/self-adjusters, other related brake hardware, and backing support plates. ATI 5(E) The student will lubricate, reassemble, and pre-adjust brake shoes and parking brake. ATI 5(F) The student will remove, inspect for damage or wear, clean, lubricate, and reassemble pads and retaining hardware, caliper assembly, and mounting components such as slides and pins for proper operation. ATI 5(G) The student will retract and re-adjust caliper piston on an integral parking brake system. ATI 5(I) The student will check brake pedal travel with, and without, engine running to verify proper power booster operation. ATI 5(J) The student will check vacuum supply from a manifold or auxiliary pump to vacuum-type brake power booster. ATI 5(L) The student will describe the operation of a regenerative braking system. 		
Period 2 26 Days	NATEF V. Brakes C. Drum Brakes	9 Days	NATEF V.C
	NATEF V. Brakes C. Drum Brakes 1. The student will remove, clean, and inspect brake drum; measure brake drum diameter; determine serviceability. NATEF V. Brakes C. Drum Brakes 2. The student will refinish brake drum and measure final drum diameter; compare with specification. NATEF V. Brakes C. Drum Brakes 3. The student will remove, clean, inspect, and/or replace brake shoes, springs, pins, clips, levers, adjusters/self-adjusters, other related brake hardware, and backing support plates; lubricate and reassemble. NATEF V. Brakes C. Drum Brakes 4. The student will inspect wheel cylinders for leaks and proper operation; remove and replace as needed. P-2 NATEF V. Brakes C. Drum Brakes 5. The student will pre-adjust brake shoes and parking brake; install brake drums or drum/hub assemblies and wheel bearings; make final checks and adjustments.		

	NATEF V. Brakes D. Disc Brakes	8 Days	NATEF V.D
	 NATEF V. Brakes D. Disc Brakes 1. The student will remove and cleatermine necessary action. NATEF V. Brakes D. Disc Brakes 2. The student will inspect caliper damage; determine necessary action. NATEF V. Brakes D. Disc Brakes 3. The student will remove, inspect determine necessary action. NATEF V. Brakes D. Disc Brakes 4. The student will lubricate and repads and inspect for leaks. NATEF V. Brakes D. Disc Brakes 5. The student will clean and inspect thickness variation, and lateral runout; determine necessary actions. NATEF V. Brakes D. Disc Brakes 6. The student will remove and rei NATEF V. Brakes D. Disc Brakes 7. The student will refinish rotor or specification. NATEF V. Brakes D. Disc Brakes 8. The student will refinish rotor of specification. NATEF V. Brakes D. Disc Brakes 9. The student will retract and reation. NATEF V. Brakes D. Disc Brakes 10. The student will check brake policies and reation. 	mounting and slides/pins at, and/or replace brake part einstall caliper, brake part ect rotor and mounting s install/replace rotor. In vehicle; measure final p f vehicle; measure final p adjust caliper piston on a bad wear indicator; deter	s for proper operation, wear, and bads and retaining hardware; ds, and related hardware; seat brake urface, measure rotor thickness, rotor thickness and compare with rotor thickness and compare with n integral parking brake system. mine necessary action.
	Brakes E. Power-Assist Units – Related Systems (i.e. Wheel Bearings, Parking Brakes, Electrical)	8 Days	2.A, 2.B, 2.C, 3.C, 3.E, 5.F, 8.A, 8.B, 8.C, 8.D, 8.E, 8.F, 8.G, 8.H
Grading Period 3 25 Days	 ATI 2(A) The student will demonstrate effective oral communication skills with individuals from varied cultures such as fellow students, coworkers, and customers. ATI 2(B) The student will demonstrate effective written communication skills, including documenting on a repair order the customer concern/complaint, root cause of the failure, and corrective action to complete the repair. ATI 2(C) The student will demonstrate mathematical skills in performing addition, subtraction, multiplication, division, and measurements using decimals and fractions in the metric and U.S. standard systems as appropriate. ATI 3(C) The student will describe the function of the automotive chassis components including braking, steering, transmission, drive train, and suspension systems. ATI 3(E) The student will use published specifications to diagnose component wear and determine necessary repairs. ATI 3(F) The student will inspect, service, and repair chassis and power train components and systems. ATI 8(B) The student will identify the different fluid types used in both an automatic and manual transmission/transaxle. ATI 8(C) The student will identify the fluid types and capacity required by application using service information. ATI 8(D) The student will check fluid level in a transmission or a transaxle equipped with a dipstick. ATI 8(D) The student will check fluid level in a transmission or a transaxle equipped with a dipstick. ATI 8(F) The student will drain and replace fluid and filter or filters in an automatic transmission/transaxle. ATI 8(G) The student will inspect power train mounts. NATEF V. Brakes E. Power-Assist Units 1. The student will check brake pedal travel with, and without, engine running to verify proper power booster operation. NATEF V. Brakes E. Power-Assist Units 2. The student will identify components of the brake power assist system (vacuum and hydraulic); check vacuum supply (ma		
	NATEF V. Brakes F. Related Systems (i.e. Wheel Bearings, Parking Brakes, Electrical)	8 Days	NATEF V.F
	NATEF V. Brakes F. Related Systems (i.e. Wheel Bearings, Parking inspect, repack, and install wheel bearings; replace seals; install hub NATEF V. Brakes F. Related Systems (i.e. Wheel Bearings, Parking system components for wear, binding, and corrosion; clean, lubricate NATEF V. Brakes F. Related Systems (i.e. Wheel Bearings, Parking operation and parking brake indicator light system operation; determ NATEF V. Brakes F. Related Systems (i.e. Wheel Bearings, Parking brake stop light system. NATEF V. Brakes F. Related Systems (i.e. Wheel Bearings, Parking and race. NATEF V. Brakes F. Related Systems (i.e. Wheel Bearings, Parking wheel studs.	and adjust bearings. Brakes, Electrical) 2. The adjust and/or replace Brakes, Electrical) 3. The ine necessary action. Brakes, Electrical) 4. The Brakes, Electrical) 5. The	ne student will check parking brake as needed. ne student will check parking brake ne student will check operation of ne student will replace wheel bearing

	NATEF V. Brakes G. Electronic Brake, Traction Control, and Stability Control Systems	9 Days	NATEF V.G
	NATEF V. Brakes G. Electronic Brake, Traction Control, and Stability control/vehicle stability control system components. NATEF V. Brakes G. Electronic Brake, Traction Control, and Stability of a regenerative braking system.	· -	-
	Electrical/Electronic Systems	10 Days	1.A, 3.F, 3.G, 3.H, 3.I, 3.J, 3.K, 3.L, NATEF
	Wiring & Wire Repair	12 Days	
	Circuit Testing	10 Days	VI.A
Grading Period 4 32 Days	Electrical/Electronic Systems Wiring & Wire Repair Circuit Testing ATI 1(A) The student will demonstrate knowledge of the technical knowledge and skills related to health and safety in the workplace such as safety glasses and other personal protective equipment (PPE) and safety data sheets (SDS). ATI 3(D) The student will demonstrate knowledge of the technical knowledge and skills related to health and safety in the workplace such as safety glasses and other personal protective equipment (PPE) and safety data sheets (SDS). ATI 3(D) The student will dentify the appropriate oil viscosity and capacity. ATI 3(F) The student will identify the appropriate oil viscosity and capacity. ATI 3(F) The student will everity operation of the instrument panel engine warning indicators. ATI 3(H) The student will perform common fastener and thread repair, including removing broken bolt, restoring internal and external threads, and repairing internal threads with thread insert. ATI 3(I) The student will perform common fastener and thread repair, including removing broken bolt, restoring internal and external threads, and repairing internal threads with thread insert. ATI 3(L) The student will perform engine oil and filter change. ATI 3(L) The student will perform any streams A. General 1. The student will research vehicle service information including vehicle service history, service precautions, and technical service bulletins. NATEF VI. Electrical/Electronic Systems A. General 1. The student will demonstrate proper use of a digital multimeter (DMM) when measuring source voltage, voltage drop (including grounds), current flow, and resistance. NATEF VI. Electrical/Electronic Systems A. General 4. The student will demonstrate proper use of a digital multimeter (DMM) when measuring source voltage, voltage drop (including grounds), current flow, and resistance. NATEF VI. Electrical/Electronic Systems A. General 3. The student will use a test light to check operation of electrical circuits. NATEF VI. Electrical/Electronic Systems A.		
	Electrical/Electronic Systems:		
Grading Period 5 <mark>32 Days</mark>	Battery Testing & Service	10 Days	5.D, 5.B, 6.A, 6.B, 6.C,
	Starting Systems & Diagnosis	10 Days	6.D, 6.E, 6.F. 6.G, 6.H, 6.I, 6.J, 6.K, 6.L, 6.M,
	Charging Systems & Diagnosis	12 Days	6.N, NATEF VI.B

	 ATI 5(D) The student will service and repair electrical and electronic systems. ATI 5(B) The student will remove, repair, and replace engine components. ATI 6(A) The student will demonstrate knowledge of electrical/electronic series, parallel, and series-parallel circuits using 		
	principles of electricity as defined by Ohm's Law.		
	ATI 6(B) The student will demonstrate proper use of a digital multimeter (DMM) when measuring source voltage, voltage drop,		
	current flow, resistance, and ground circuits.		
	ATI 6(C) The student will use wiring diagrams to trace electrical/elec		
	ATI 6(D) The student will demonstrate knowledge of the causes and	l effects from shorts, grounds, opens, and resistance	
	problems in electrical/electronic circuits. ATI 6(E) The student will confirm proper battery capacity for vehicle	application and perform battery capacity test	
	ATI 6(F) The student will perform battery state-of-charge test.	application and perform battery capacity test.	
	ATI 6(G) The student will inspect and clean the battery, fill battery cells, and check battery cables, connectors, clamps, and hold-		
	downs.		
	ATI 6(H) The student will perform starter current draw test.		
	ATI 6(I) The student will inspect and test fusible links, circuit breakers, fuses, and relays.		
	ATI 6(J) The student will perform charging system output test. ATI 6(K) The student will inspect, adjust, or replace generator/alternator drive belts and check pulleys and tensioners for wear		
	and belt alignment.		
	ATI 6(L) The student will verify operation of instrument panel gauges	s and warning/indicator lights, and reset maintenance	
	indicators.		
	ATI 6(M) The student will inspect interior and exterior lamps and soc driving lights and replace as needed.	ckets, including headlights and auxiliary light such as fog and	
	ATI 6(N) The student will verify windshield wiper and washer operati	ion and replace wiper blades as needed	
	NATEF VI. Electrical/Electronic Systems B. Battery Service NATEF VI. Electrical/Electronic Systems B. Battery Service 1. The student will perform battery state-of-charge test; determine		
	necessary action.	iddent will perform battery state of sharge test, determine	
	NATEF VI. Electrical/Electronic Systems B. Battery Service 2. The s	student will confirm proper battery capacity for vehicle	
	application; perform battery capacity and load test; determine necessary action.		
	NATEF VI. Electrical/Electronic Systems B. Battery Service 3. The student will maintain or restore electronic memory functions. NATEF VI. Electrical/Electronic Systems B. Battery Service 4. The student will inspect and clean battery; fill battery cells; check		
	battery cables, connectors, clamps, and hold-downs.	sudent will inspect and clean battery, hill battery cens, check	
	NATEF VI. Electrical/Electronic Systems B. Battery Service 5. The s	tudent will perform slow/fast battery charge according to	
	manufacturer's recommendations.
